System 9760

Powerful Video Security Made Simple

Flexible, Functional Video Management

The Pelco System 9760™ video matrix switching and control system offers complete management of medium and large-scale security installations, delivering the functionality you need for a wide variety of applications.

Complete Management

We recognize the fact that in order to achieve error-free system operation around the clock, a system's keyboard must offer a level of usability and customization that anyone can quickly understand.

From operating as a powerful stand-alone switcher, to integrating seamlessly into existing security and surveillance systems, the Pelco System 9760™ video matrix switching and control system provides multiple operators the ability to quickly and easily view and control cameras for general surveillance, and visual verification of alarm events. The system's true-networking (master to master) backbone allows up to 24 individual systems to be distributed and controlled centrally and locally.

At the core of System 9760 is a nonproprietary, software-based operating platform that offers many features not available in other systems, such as built-in video loss detection, intelligent keyboard communication, and extensive macro abilities and networking capabilities, to name a few. System 9760's Windows® based Administration Software allows for fast, easy, uninterrupted programming and editing of the entire system with no down time. With this powerful software, users can setup, control, administer and make on-going changes to a System 9760 configuration of any size.

And for maximum efficiency, the CM9760-KBD offers twenty-four user-definable "soft keys" that may each be labeled application specific, allowing for logical camera selection based on the camera's field of view rather than based on camera numbers.

With powerful flexibility and a whole host of pull-down menus and on-line help windows – systems programming, operation and maintenance are simple.

LCD Icon Menus and Keyboard Utility Software

The system's easy-to-use icon based operation provides for quick feature access right from the very first menu. And the Keyboard Utility Software allows users to define and assign all of the programmable keys of the System 9760 keyboard without interrupting operation.

Simple Operation Minimizes Training

Our design team assembles and tests System 9760 orders as a complete system just as intended for use. This ensures that the units you receive are fully functional and are properly tested.

Multiplexer Control

Direct interface to many well-known multiplexers allows operators to control external multiplexers from the systems keyboard. Simple icons guide the user through the multiplexer's functions such as Full-screen, Quad, 9-view, and 16-view displays.

DVR Management and Control

Control over DVRs can be accomplished directly from System 9760 Keyboards using the DVR management option. Easy to follow icons permit access to suitable DVR functions such as: Play, Record, Fast Forward, Pause, Eject and Stop. Operators need not move from their station or individually operate multiple devices. Control over the entire system is centralized at the system keyboard and also includes built-in video loss detection and system diagnostic features.

Full Pan/Tilt/Lens Control

For smooth and reliable operation of cameras, pan/tilt devices, and dome systems, the System 9760 keyboard makes use of a vector-solving, variable-speed joystick that responds quickly and accurately to an operator's every request. This intelligent interface allows for the remote positioning of cameras to occur in either straightforward or diagonal directions and can vary the speed of remote positioning devices for tracking purposes.

Get More With Pelco

It all starts with a relentless commitment to Fanatical Customer Service. Each and every person at Pelco will stop at nothing to ensure that our customers are completely satisfied each and every time. Just ask anyone who has ever worked with us. Stringent design, engineering and testing certifications ensure that your next Pelco purchase will deliver the performance that you and your installation demand.
