**PRODUCT SPECIFICATION**
# VISIONPOINT™ ENTERPRISE SERVER

# Central administration, monitoring, and operation of 3VR systems across global networks

Centrally manage and operate extensive networks of 3VR systems with single sign-on capabilities when VisionPoint™ Enterprise Server connects hundreds of 3VR systems. VisionPoint™ Enterprise Server gives you the flexibility to install 3VR's enterprise software onto COTS hardware*. With VisionPoint™ Enterprise Server deployed, 3VR OpCenter and 3VR System Manager Enterprise provide these powerful enterprise features:

## CENTRAL USER ADMINISTRATION

Centrally manage roles, users and permissions: Single sign-on access provides the capability to centrally administer all system users.

## STREAMLINED MANAGEMENT OF SYSTEMS

Configure systems and cameras easily across the enterprise: Simplify set-up of numerous deployments across the enterprise and reduce errors with custom configuration templates.

Apply automatic verification installation reports to ensure 3VR installs meet a customer's security standards: With these reports, one can identify mis-configurations or errors so that issues can be resolved immediately.**

Use central troubleshooting tools for efficient system management: System Manager Enterprise offers features such as remote reboot and connectivity tests so that managers can address issues quickly.

Update system software effortlessly across the enterprise: With "over-the-wire" upgrades, maintaining systems with the latest software and features is a straightforward, undemanding process.

## GLOBAL HEALTH MONITORING

Monitor health alerts across the enterprise: Reduce downtime with real-time system and email alerts of system, camera, hard drive and data integration issues.

View custom health reports to simplify health monitoring: Pull custom reports at any time to look at alerts and overall health. 3VR also provide intelligent filtering of alerts, so that nuisance alerts are discarded and reduced.

## ENTERPRISE SEARCHING AND CASE MANAGEMENT

Conduct faster, more thorough investigations with enterprise searches: Searches for activity or for similar persons or license plates can be conducted across several locations, helping to uncover repeat criminals.

Centrally create and share cases as well as watchlists, making case building more efficient and effective: Build more powerful cases with central case management and watchlists.

* Please see your 3VR reseller or 3VR representative for hardware requirements    ** Available separately, on a custom basis

# VISIONPOINT™ ENTERPRISE SERVER

## Ordering Info

| Product | Product Code |
|---|---|
| 3VR VisionPoint™ Software Enterprise Server base license. Connection licenses not included | VP-EP-VMS |
| One 3VR VisionPoint™ Software Enterprise Server connection | VP-EP-CON |
| Note: Please consult your 3VR price guide or your 3VR account manager for more information. | |

## Features

### GENERAL

| | |
|---|---|
| Single Sign-on | Yes |
| System Compatibility | Enterprise and servers must be on same software version |
| Number of 3VR Systems Supported | Unlimited |
| Local Application Support | Yes, local System Manager Enterprise. Local OpCenter is not accessible from the Enterprise server |
| Remote Application Support | Yes, System Manager Enterprise and OpCenter applications |
| Time Synchronization Across Enterprise | Yes |

### 3VR SYSTEM MANAGER ENTERPRISE APPLICATION

| | |
|---|---|
| Central User Management | |
| Ability to Restrict User Access of Specific Systems or Predefined Regions (e.g. create roles that enable ability to configure systems but disable exporting of cases) | Yes |
| Automatic password expiration and renewal available | Yes |
| Central Systems Management | |
| Centralized Configuration of System and Camera Settings | Yes |
| One-click Enterprise Software Updates | Yes, over-the-wire |
| System and Camera Configuration Templates | Yes, create and apply custom templates |
| Automatic Backup of System and Camera Configurations of Individual servers | Yes |
| Automatic Installation Verification Reports Available | Yes, available separately on a custom basis |
| Enterprise Troubleshooting | Yes |
| Remote reboot | Yes |
| Live video check available | Yes |
| Test connectivity of systems | Yes |
| Custom Reports on System Configurations Available | Yes |
| Central Health Monitoring | Yes |
| Health alerts monitoring systems, cameras, network connections, and integrated data systems | Yes |
| Receive customized health alerts by email | Yes |
| One-click server connection status update | Yes |
| Intelligent Filtering of Nuisance Alerts | Yes |
| Central Health Reporting | Yes |
| Custom reports on systems issues | Yes |
| Custom reports on systems health | Yes |

### 3VR OPCENTER APPLICATION

| | |
|---|---|
| Monitoring and Investigations | |
| Enterprise Searching | Yes |
| Share Watchlists of Suspects' Faces among the Enterprise | Yes |
| Create and Share Suspect Alerts across the Enterprise | Yes |
| Central Management of Cases | Yes |
