### NETWORKING:

Each phone comes with a built in switch that allows you to connect the phone to the Internet connection in an office. If your existing network provides gigabit speeds, then a phone with gigabit capability is recommended.

### PoE:

Power over Ethernet allows the phone to be used without the included power adapter if your network switch is capable of providing power to devices connected to it.

### HEADSET CAPABLE:

All phones allow the use of external headsets. Please make sure to check the headset you buy to ensure it will work with your phones.
